DID YOU KNOW?

Everco[®] HD Offers Brushless (BLDC) Blower Motors

NEWER TECHNOLOGY

Brushless blower motors are designed to provide precise control and a longer lifespan. The newer technology adds to the complexity of the motor's electronics which come with an increased cost. However, with efficiencies such as increased speed control, reliability and service life, investing in a brushless blower motor can often be recovered throughout the life of the unit.

WORLD CLASS MANUFACTURING

As a basic manufacturer in blower motors, our Unimotor[®] manufacturing facility has the ability to identify known flaws and engineer/manufacture a solution. Our attention to detail delivers a quality brushless blower motor featuring:

- Custom Unimotor[®] Wheel Design
- Sensorless Open-Loop Commutation
- EMI Suppression
- Soft Stall and Hard Stall Protection
- Over Current Limit Protection
- Soft Start / Stop Acceleration
- Hermetically Sealed Electronics
- Integrated Cooling
