

A6 Compressors

OUT WITH THE OLD...

Original Cast Iron Version

- Old 6 piston design
- Cast iron rear head & heavy steel case weighs 35 pounds
- Dated oil reservoir/sump

...IN WITH THE NEW!

Updated Aluminum Version

This newly engineered A6 design is expertly engineered for a quieter, more efficient, light weight design.

- New design with 10 pistons
- Teflon coated pistons reduce friction increasing efficiency and smoothness
- Double lip seal prevents shaft seal leaks
- New light weight aluminum case weighs less than half of competitive A6 designs

Part Number	Buyer's Guide

963055	Shuttle Bus / Van
969109	Case; John Deere; International / Navistar
974605	International HD / Navistar
975741	Caterpillar; Massey

Everco® HD 10 Cylinder Compressors

The Everco® HD 10 piston swash plate design compressors use the latest technology to ensure performance that meets O.E. specifications. With less torque required to move pistons, this unit is able to provide quieter performance and smoother operation. The dowel pin design prevents twisting of case halves.
